

hello!

I'm your new radon test kit.

Take me out of my plastic wrapping and hang me up by my hook!

Radon:
Leading cause of lung cancer for non-smokers.

Only 1 out of 4 lung cancer patients are living 5 years after diagnosis.

1 out of 4 homes in Connecticut have high radon.

YOU can reduce your lung cancer risk by TESTING your home for radon!

I'm easy to use.
Turn over to find out how.

HOW TO TEST FOR RADON

in **5** Easy Steps

1 Unwrap. Fill out test kit information.

2

Place cardboard in mouth of kit like so.

3

Hang the test kit up by its hook. Keep up 3 – 7 days.

- Test the lowest level of the home you regularly use (10+ hours a week).
- Hang it up at least 20" above the floor.
- Keep windows closed.
- 3 feet from windows/exterior doors and do not place in kitchen or bathroom.

4

Cut off hook, take out cardboard, seal it, and write down the serial number.

5

Fill out all information and mail it in right away.
